Felder AF16 Extractor-

Maximum extraction in very little space!

With high operational comfort thanks to the quick-change chip collector system, and a large connection for tube and pipe extraction, this is a top quality European extractor to keep your workshop clean and tidy.

The AF16 features a steel frame for warp resistance as well as a 5mm thick steel impeller to resist any damage from large offcuts. The high-class motor from ATB in Austria guarantees reliability and suction power.

The AF16 is provided with a Class-L filter and can be optionally upgraded to a Class-M filter (Class-M is the recommended filtration level when working with wood-dust according to EN 60335-2-69:2012).

Felder AF16 Extractor-

Quick collection bag changeover

2 Quick-lock clamps on the front of the machine allow the most ergonomic changeover of plastic bags on a mobile extractor, making an otherwise difficult and dirty task extremely quick and clean.

Optional Class-M Filters

The optional Class-M filters provide a higher degree of dust filtration for reduced contamination of your workshop. This is an active step towards ensuring the health of you and your workers.

Optional Class-M Filter Cleaner

The optional Class-M filter cleaner keeps the filter clear of blockages for consistent high airflow results.

Overview and features

Prod code: 401-247

Specifications

Motor	2.2kW (3hp)
Air flow	50m³/min (1766CFM)
Dust extraction	160mm
Collection bag	1 x 200L
Weight	52kg
Air pressure	2150Pa

Specifications are subject to change without notice.
