

Two stage dust cyclone, This machine provides a combination of both power and portability with exceptional performance for both fine dust and particles.

Easy to maneuver with stable casters the negative pressure in the dust drum design creates a vacuum between the plastic dust bag and dust drum.

Automatic filter cleaning for consistent performance the filter cartridge captures 99% of dust from 0.20-2 microns.

The design keeps the PE bag a press fit inside the dust drum.

Overview and features

- Filter will collect 99.9% of particles from 0.2 - 2 microns
- Automatic filter cleaning
- Air suction capacity 1756 cfm
- Drum Capacity 60 Gallon

Specifications

Motor 2.2kw (3hp) single phase
Air flow 1756 CFM
Noise level 78 dB
