

Constant feed speed and exact guidance of your workpiece means standard tasks are performed precisely and safely.

Felder's F348 offers 3 driven rollers and four feed speeds to give you the control and accuracy you need, and the advanced tilting head allows for every conceivable position.

Advantages: Exact and clean work, constant feed speed, uniform and precise results. Advanced tilting head for every feed position.

Overview and features

Please note, power feed units fitted to a machine should stop when the machine stops.

It is advisable that this power feed unit is integrated to the primary machine's emergency stop circuit.
