

Excellent corrosion protection as well as a superior lubricating and cleaning effect.

The Felder Metal Protect Premium Anti-Rust agent is ideally suited for the long-term preservation of machines. By displacing moisture, it protects the machine against rust for a long time. It contains no wax, can be used at temperatures from -40°C to +150°C, is also effective in high humidity and aggressive ambient air and is also resistant to salt water.

Felder Metal-Protect Premium offers a considerably longer lasting corrosion protection than Felder Metallglanz, which instead combines a cleaning effect with short-term corrosion protection.
