

Yilmaz DC421P Double Mitre Saw-

Yilmaz Double Mitre Saws offer the ultimate in cutting efficiency and versatility. They are able to cut large quantities of various profiles quickly and accurately without the costly mistakes commonly associated with “normal” single head cutting machines.

Yilmaz double mitre saws are constructed on rock-solid welded steel frames. This frame is key to their strength and rigidity. The linear rails are made from 50mm ground and hardened high carbon steel. All metalwork on these machines is completed using the latest manufacturing technology from Europe including high pressure casting and CNC machining.

Unique features of the double mitre saws include the ability to cut lengths up to 10m - much longer than the physical length of the machine. This is achieved through clever use of the software in the CNC controller. The machine will also auto feed and cut mitres.

Overview and features

- Two hand safety operation
- LCD touch screen controller
- Internal cutting angle 45°, external cutting angle 22.5°
- 4 x horizontal & 2 x vertical pneumatic clamps
- Hydro pneumatic blade feed for smooth cutting (fully adjustable)
- Accurate to +/- 0.2mm
- Roller support table & automatic profile support
- Automatic safety guards
- Automatic angle selection for 45° and 90°
- Intermediate angles set via graduated scale
- Repeat feed and cut auto mode at 90° (slicing)
- Air gun
- 2 x high quality blades included
- Spray mist blade lubricator with on/off switch

Specifications

Air consumption 6-8 bar

Weight 905kg

Max. saw blade Ø 3000rpm

Motor 2.2kW x 2 - 3 phase

Specifications are subject to change without notice.
