

The ERM1050 - a machine that belongs in every small workshop!

1 - 2 - 3 - finished rounded work-piece corners now only in 3 seconds!

You can now round ABS and PVC corner edges in less than 3 seconds. Simply place the workpiece into the unit, press the pedal and the corner is rounded. It really is that simple and precise. Felder's corner rounding unit offers professional processing of all types of workpiece edges including edges of post or soft forming materials.

Please note machine images may show optional equipment.

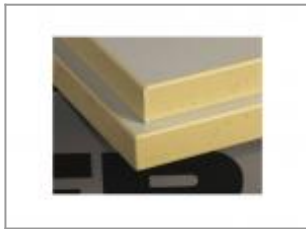

# Felder ERM1050 Corner Rounder-

**FELDER**

## Workpiece holder

The pneumatic clamp prevents the workpiece from slipping during processing. This guarantees optimum working results, even when working with larger workpieces.

## Processed materials

The ERM 1050 offers professional processing of all types of edges incl ABS, PVC and solid strips between 0.4 and 3.0 mm in thickness. Additionally the ERM 1050 can also process post- or softforming workpieces.

## Router bits

The use of different router bits increases the flexibility and range of material that can be used. In addition the support bed provides a perfect processing of the workpiece. As standard 2 router bits are provided with 2 mm and 3 mm radius.
