

Homag is the worldwide market leader of edgebanders, and their EDGETEQ range is perfectly suited to the small to mid-sized companies of New Zealand.

Is your entry-level machine stretched to its limits? Then it is time to take the next step with the EDGETEQ S-300 series of machines. Based on the popular 'Ambition' range (previously branded 'Brandt'), Homag's EDGETEQ S-300 machines present a high-performance mid-range solution.

They feature multi-level technology for automated processing of different profiles, as well as a grooving unit or the latest zero joint technology offered by the airTec unit. The high level of automation of the units ensures short setup times and optimum ease of use.

- 8 different models to meet every requirement
- From manual adjustment to full automation
- Intuitive operation - innovative powerTouch control system
- Highly flexible configuration

For the most demanding standards of quality and reliability there is no substitute for a Homag.
