

Homag is the worldwide market leader of edgebanders, and their EDGETEQ range is perfectly suited to New Zealand.

A highly flexible allrounder, and based on the popular 'Ambition 1800' range (previously branded 'Brandt'), Homag's EDGETEQ S-380 profiLine machines are freely configurable due to the machine frame setup. Choose from a wide range of units you create a machine that meets your requirements exactly.

For the most demanding standards of quality and reliability there is no substitute for a Homag.
