

Constant feed speed and exact guidance of your workpiece means standard tasks are performed precisely and safely.

Felder's F48 is an industrial power feeder with 4 driven rollers and eight feed speeds, giving you the control and accuracy you need. The advanced tilting head allows for every conceivable position.

## Overview and features

Please note, power feed units fitted to a machine should stop when the machine stops.

It is advisable that this power feed unit is integrated to the primary machine's emergency stop circuit.

Order code 05-0-006
