

Felder FST160 Sanding table-

FELDER

Clean workshop - clean workpieces - good for your health!

The Felder sanding table FST160 can quickly and easily be connected to existing extraction systems and is immediately ready for use. The 1530 x 800mm, continuously extracted work surface guarantees a clean workplace and optimum working conditions. Thanks to an offset working area, even edge sanding work can be carried out easily and cleanly as well.

The sanding table FST 160 can be adjusted in height from 726 to 1026mm, but becomes particularly flexible in combination with the Felder work bench FAT 300 (shown in the image above), which provides 600mm of continuous height adjustment and easy mobility.

Please note machine image shows the optional FAT300.
