

IF Peanut 1 Drill Pack-

The Peanut 1 Drill Pack comprises of a 24.9mm and 5mm solid carbide CNC drill. The drill pack is used to create the holes for the Peanut 1 connector.

To produce the Peanut 1 holes, the 5mm hole must be drilled prior to the 25mm hole. This will ensure a perfect recess for the Peanut 1.

The 24.9mm CNC drill is designed to create a hole which perfectly fits the Peanut 1 connector. A 25mm CNC drill can still be used to create an almost perfect fit.
