

Weinig Cube Foursider-

Four sided planing has never been so easy.

Fast, precise, efficient, and no set-up! Create precise 90° right angled, dimensionally accurate, straight workpieces in a single pass.

The Cube is 10 times faster than straightening with a buzzer and thicknesser, slashing your skilled labour costs, production time, and production errors.

Anyone can run a Cube - forget about expensive training. Dimension changes are performed six times faster than with the familiar motorised spindle adjustment.

- Spindle settings projected onto workpiece by laser - no more "scant" or hit and miss
- Optimised extraction hoods and specially designed tools reduce extraction requirements by up to 60%
- Easylock tooling lets you resume production straight after a knife change, without even changing any settings!

Weinig Cube Foursider-

Energy efficient

Energy efficiency is on everyone's agenda, and the Cube leads the way. With optimised extraction hoods and a ventilation effect generated by specially developed tools, extraction requirements are reduced by up to 60%.

Get optimal results with MoulderPreView

Know in advance what will come out afterwards! Spindle settings are projected onto the workpiece by laser, allowing you to optimise settings before processing with even chip removal from all four sides. No more "scant" or hit and miss.

Simple, accurate knife changes with the EasyLock system

Production can resume straight after a swift knife change without adjusting any machine settings. It simply doesn't get any easier!

Overview and features

Specifications

Motor	Approx 18kW combined
Weight	2100kg
Working width	20 - 260mm
Working height	8 - 160mm
Feed speed	6 - 12m/min

Specifications are subject to change without notice.
