

You can immediately see in the D963's design the core competencies of a Felder thicknesser: strength, stability and ease of use at the highest level. With a planning width of 630 mm the D963 is a powerhouse in performance and precision. Innovative controls, large and heavy precision components show first class workmanship through maximum precision and durability.

In addition to the massive thickness table, the precise setting accuracy and the four trapezoidal spindles, you get the Silent-POWER® spiral cutterblock which provides an excellent planning result.

Suited to professional users in trade, commerce and industry, the D963 offers excellent results, time after time.

Please note machine images may show optional equipment.

Silent-POWER cutterblock

The advantages of Silent-Power at a glance:

- Extremely quiet; noise is reduced by half
- Usable blade life twenty times longer than standard blades
- Larger chip space
- Tear free planing results
- Four-sided blades
- Reduced power consumption

Power-Drive

The fully electrical "Power-Drive" planer table control offers the most precise adjustment and repeat accuracy. With a twist of the knob, you can quickly adjust the planing height, then fine-adjust using the button. An integrated LED-display displays the actual value.

Digi-Drive

Enter your required dimension, press start and the planer table will move accurately to the position. Required and actual values are shown on LED displays. Additional optional functions, such as incremental position and four programmable thicknesser table positions are available.
