

Mafell MT55cc Plunge Saw-

The new Mafell MT55 plunge saw offers unrivalled precision, ergonomics and power.

Unlike traditional circular saws, the sawblade is contained within the bodywork of the tool and is only exposed when plunged into the surface of the material. Not only is this a significant safety advantage, it is also perfectly suited to running on guide rails for straight cuts over long distances.

Experience the worlds' fastest blade change on a circular saw by simply lifting the locking lever to open the bodywork, exposing the blade completely for a pain-free changeover.

At the centre of the MT55 is the 1,400 Watt, high-torque CUprex motor which delivers consistent power and speeds even on longer cuts while the unique central clamping system securely locks the heavy baseplate onto guiding rails at the front and rear with just one locking screw.

Mafell MT55cc Plunge Saw-

Sawblade changeover

Experience the worlds' fastest blade change on a circular saw by simply lifting the locking lever to open the bodywork, exposing the blade completely for a pain-free changeover. When the sawblade guard is open the saw-spindle is automatically locked and the starting lock-out is engaged.

Adjustable scale

The depth of cut scale is easily adjustable with a two-way position. One position displays the depth of cut on the rails and the second position shows the depth of cut off the rails.

Guide rails

The Mafell Guide Rails of varying lengths between 0.8m to 3.1m allow for precise and straight cuts time after time. Guide rails can be joined together to increase the total distance.

Overview and features

Specifications

Motor	1.4kW (1.9hp)
Weight	4.5kg
Maximum cutting depth	57mm
Saw blade speed	3,600 - 6,250rpm
Cutting width @ 90°	0 - 57mm
Cutting width @ 45°	0 - 40.5mm
Tilt range	-1 to +48°

Specifications are subject to change without notice.
