

Virutex AB111N Biscuit Jointer-

The Virutex AB111N Biscuit Jointer is specially designed for grooving panels in any position, featuring a micrometric fence which can be adjusted at any height and angle.

A pre-adjusted stop allows you to select the different grooving depths quickly and easily. The machine is typically used on panels of 16, 19 and 22mm thickness, but it is possible to work on thicker pieces, thanks to the movable fence.

The AB111N is equipped with a 900W motor with constant torque control for a constant motor speed under load.
