

Tormek MB100 Multi Base-

With the Multi Base MB100, you can sharpen on the side of the Tormek diamond wheels to create a completely flat bevel that is preferable in some applications.

The MB100 is fully adjustable so you can find the optimal position for each tool. For convenience, it can be mounted both vertically and horizontally.

This jig is suitable for knives, axes, woodturning tools, carving tools, chisels and plane irons and is compatible with the WM200 AngleMaster provided with all Tormeks.

Please note: the MB100 is only designed for sharpening with Tormek Diamond Wheels. It is not suitable for regular grinding stones as they would require truing which is not possible on the side.
