

Tormek SVH320 Planer Blade Attachment-

The SVH320 is for sharpening blades of any length. Blades longer than 270mm (10½") are relocated in the blade holder and ground in two steps. The grinding depth can be set within 0.1 mm (0.004").

The minimum width of blade is 13mm (½").

Tormek SVH320 Planer Blade Attachment-

Overview and features

With this attachment, the tool is guided precisely and ground flat along its whole length to a pre-set fixed depth. This is not the case with the other Tormek jigs, where your hand controls where the grinding occurs and also controls the depth of grinding. It is important that the grinding angle is set with great accuracy. If you follow the detailed step by step instructions carefully, you will be satisfied with the results.
