

Tormek T4 Bushcraft Wetstone Grinder-

With your Tormek T-4 Bushcraft, you can sharpen your knives and axes to make them sharper than when they were new and get them ready for hunting, outdoor activities and adventures.

This sharpening machine is versatile, and it's easy to learn how to use it. You decide the angle based on what you want to use your tool for.

The compact design makes it easy to take with you, no matter where you're going

Tormek T4 Bushcraft Wetstone Grinder-

A cast zinc top for greater precision

The sleeves for the Universal Support are cast in the zinc top. This, together with the Tormek stadium-shaped design of the holes (patent pending), means the precision of this grinder has been improved by 300% compared to the T3 model.

SG200 Grindstone

Tormek's original grindstone, and the one that comes as standard on your T4. The SG200 Original Grindstone has evolved over the years to offer the best combination of efficient steel removal, smooth surface finish and a long life. This stone efficiently cuts all types of tools and steel qualities, including HSS.

Including Leather honing wheel

The leather honing wheel gently removes the burr which develops during grinding and polishes the bevel. It is used together with the Honing Compound PA-70.

Tormek T4 Bushcraft Wetstone Grinder-

Overview and features

Why Tormek?

- **Sharpen all your edge tools**

With the wide range of Tormek patented jigs, you can sharpen practically all types of edge tools. Tormek is dedicated to developing water cooled sharpening through innovative solutions.

- **Exact replication**

The key word when sharpening the Tormek way is repeatability. You can shape the tool exactly to your needs. Even complicated shapes such as fingernail turning gouges, spoon carving gouges and oval skew chisels with a radiused edge are easily sharpened.

- **Cleanest edges**

You finish the sharpening process by honing and polishing the edge on the leather honing wheel. You get a razor sharp edge.

- **Fast sharpening**

Once the shape is created, you remove only a fraction of the steel when re-sharpening, which makes it a quick job.

- **Full control**

At the low speed, you have full control of the sharpening and remove no more steel than necessary. An extra benefit is that your tools last longer.

- **No risk of overheating**

There is no risk that the edge becomes overheated and loses its hardness.

- **Safe and quiet**

Worn steel particles are deposited into the water trough, keeping the air clear of grinding dust. No sparks are produced, avoiding a potential fire hazard in workshops with a lot of wood dust. You will also find that the Tormek runs surprisingly quietly.

- **Quality and performance**

Buying a Tormek is a safe investment in quality and performance with a 7 year warranty. You are assured that all future developments will fit your machine.

*When used for commercial, industrial or educational purpose, the T4 warranty is 2 years.

Tormek T4 Bushcraft Wetstone Grinder-

Specifications

Housing	Zinc cast top, impact resistant ABS plastic
Grindstone	200 × 40mm (8" × 1 5/8")
Leather honing wheel	145 × 26mm (5 3/4" × 1")
Rise & fall	30min/hour
Table size	120rpm
Motor	120W (input)
Noise level	Near silent running, 54dB
Weight	8kg (machine only)

The Tormek T-4 Bushcraft comes with everything you need to sharpen your knives and axes for hunting, fishing and outdoor activities

- KJ-45 Centering Knife Jig for sharpening all your hunting, fishing and outdoor knives
