Tormek AWT250 Advanced Water Trough-

The Advanced Water Trough AWT-250 has an enlarged standard lip which ensures that your workbench stays free from water. It also includes an embedded magnet to collect steel particles and a removable water chute for long tools.

Suitable for Tormek models with a stone diameter of 250mm. Fits Tormek T8, T7 & 2000.

Tormek AWT250 Advanced Water Trough-

Overview and features

Water Trough Magnet
The water trough incorporates a strong magnet, which attracts the steel particles ground from the tools being sharpened. This keeps your stone clean and cutting more freely. These small steel particles are otherwise pressed into the stone surface and can disturb the sharpening.

Water Chute for Long Tools
For long tools that drip water over the edge of the lip (like chef's knives and planer blades), just add the water chute. It attaches easily and directs the water back into the trough.
