

Tormek TS740 Sharpening Station-

A top quality sharpening cabinet with purposed designed drawers to fit your Tormek accessory kits.

Sturdy steel design with scratch resistant metallic coating, rounded corners, the TS740 will fit easily into your workshop. You will be able to adjust it to your ideal working height.

Most benches are too tall to give you the correct control of your sharpening. When your shoulders are relaxed and your arms extended about waist high, you can apply the right amount of pressure and get the best results. Based on this all-important observation, Tormek designed the Sharpening Station TS740 where you will always have the perfect working position, adjustable to your height.

With the drawers designed to fit the Tormek accessory kits, your favourite jigs and accessories is always at hand and everything has its place. In short, you get a real sharpening station.
