Tormek TNT300

Woodturners Instruction

Box Overview and features

In the film, Jeff puts focus on the most important tools - which are also the most difficult to sharpen - the spindle gouge, the bowl gouge and the skew. You can watch him shape an edge to his favourite profile and see how quickly it is resharpened once the setting is done.

The handbook clearly describes the whole system and its possibilities. Numerous line drawings show step by step how to shape and sharpen your tools. Repeatability is the core word and the book explains three efficient methods for how to best replicate an edge profile.

The Instruction Box also comes with the Woodturner's Kit TNT708.
