

Tormek SVM00 Small Knife Holder

The Small Knife Jig SVM00 from Tormek can handle those really small knife blades which, up until now, have been difficult to sharpen. Normally they have been sharpened freehand but every time it has been a challenge to get a consistent shape and almost impossible to control the edge angle.

You can now sharpen knives of different shapes for whittling, chip carving and detail work. Even folding pocket knives can be sharpened with perfect control.

Since it is the handle of the knife that is mounted in the SVM00 holder, there is really no limit to how small a blade you can sharpen.

The Small Knife Holder SVM00 works in conjunction with the Knife Jig SVM45.
