Mafell Guide Rail F160, 1.6m long (5.2ft) (secondhand)

Slight bend in rail which does not effect operation as once the saw is on once a saw is on it lays almost flat.

The convenient Mafell guide rail system facilitates clean and exact cutting without tearing in conjunction with numerous Mafell machines.

The supplied plug-in end profile prevents cables and suction hoses becoming caught.

A rubber lip, guide edge and tear protection all in one – consistently facilitates high-precision cutting without tearing.

The rail can be extended with a connecting piece, from above which simply slides into position when not in use. Various standard rails can be joined together with self-aligning connecting places to obtain the required length for the job. The guide rail can be additionally secured with two screw clamps if required.

Two detachable holding strips, on the underside of the rail, offer outstanding grip and protect the surface of the work.

The upper side of the rail has a special coating which helps the tools move smoothly and effortlessly.
